PROFILE

Frontend Developer with 6 years of experience building scalable web and mobile applications using React, Angular, Next.js, and TypeScript. Proven track record of delivering award-winning projects with institutional impact. Strong expertise in transforming complex designs into pixel-perfect, responsive interfaces, always focused on code quality and user experience.

Strong advocate for clean code practices, TDD methodology, and modern development workflows including automated testing and code reviews. Experience managing development teams and collaborating directly with stakeholders to deliver effective technical solutions. Interested in connecting with international companies that value technical excellence and innovation in frontend development.

SKILLS & TOOLS

01 frontend

- react
- next.js
- typescript
- angular
- tailwind css
- framer motion
- gsap
- d3.js
- html / css
- sass
- responsive design

02 backend & tools

- node.js
- gcp
- aws
- cloudflare
- firebase
- rest apis
- git
- ci/cd
- jest
- jasmine
- karma
- webpack / vite
- jira
- agile / scrum

03 expertise

- data visualization
- interactive journalism
- editorial design
- ux / ui design
- performance optimization
- tdd
- clean code
- team leadership

EXPERIENCE

Frontend Developer II

Nov 2023 – Today

Grupo RBS · Porto Alegre, RS, Brazil

• in-person

- Worked in a newsroom with over 1000 employees through the development of interactive projects, creating hundreds of editorial content pieces and projects for campaigns such as “Pra Cima, Rio Grande”.
- Created a widely-adopted poll system using Next.js and Firebase that replaced an existing paid service.
- Developed the “Painel da Reconstrução” (Reconstruction Panel) dashboard, bringing visibility to federal investments in Rio Grande do Sul’s flood recovery efforts from May 2024. This project won the “Prêmio RBS de Jornalismo, Esporte e Entretenimento” award and inspired similar government initiatives due to its institutional impact.

Frontend Developer

Nov 2022 – Oct 2023

Flow Autobody · Brisbane, QLD, Australia

• in-person

- Developed multiple modules for applications in Angular 11 and ReactJS using TypeScript, contributing to product architecture and scalability.
- Managed sprints through Jira, coordinating task distribution and tracking progress of a 5-developer team.
- Implemented and promoted development best practices, including clean code principles in both code creation and review processes.
- Actively participated in structuring essential development processes, establishing pull request workflows, code reviews, unit testing, and AGILE meetings.
- Collaborated directly with the Product Owner on feature definition and refinement, applying technical knowledge and business rules expertise to deliver effective solutions.

Frontend Software Developer

Mar 2022 – Sep 2022

HelloGym · Osseo, MN, USA

• remote

- Developed interfaces for mobile and web application using React and Angular, implementing unit tests with JEST and Jasmine/Karma to ensure code quality and scalability.
- Created multiple screens/features following TDD methodology, converting PSD designs into pixel-perfect interfaces for the sports team management platform, always focused on responsiveness while maintaining optimized user experience.
- Implemented complex functionalities including booking system with Google Maps API integration.
- Established efficient communication with backend APIs through Axios.

Frontend Developer

May 2021 – Jan 2022

Hubcount · São Paulo, SP, Brazil

• remote

- Worked on developing and modernizing interfaces for ERP system focused on accounting solutions, actively participating in code reviews and daily meetings.
- Developed and refactored interfaces using HTML, CSS (SASS and LESS) and Angular, improving user experience and modernizing legacy components.
- Performed code optimization and cleanup, identifying and removing obsolete code to improve application performance and maintainability.

Mobile Developer Intern

Nov 2019 – Apr 2021

Idéia 2001 Informática · São Caetano do Sul, SP, Brazil

• in-person

- Developed applications using HTML, CSS, JavaScript alongside the framework AngularJS, oriented to the market of auto parts.
- Brought new ideas to the team whenever possible, always aiming for better development of the final product.
- Worked mainly on the frontend side of the projects, creating new functionalities and developing layouts.

EDUCATION

Rocketseat

2019 – 2021

React.js, React Native & Node.js bootcamp

Instituto Federal de Educação, Ciência e Tecnologia de São Paulo — IFSP

2019 – 2021

Technical Degree in System Analysis and Development

Cambridge University Press & Assessment English

2018

CEFR Levels B2 & C1 of English
